

Kansas Department of Health and Environment
Bureau of Waste Management Policy 2018-P2
Anniversary Date for Annual Renewal of Solid Waste Permits

Purpose

This policy defines the anniversary date as it relates to annual permit renewal of solid waste permits.

Background

All active solid waste permits must be renewed annually. Annual permit renewal requirements are specified in K.A.R. 28-29-84 and Bureau of Waste Management Policy 2014 P-1.

K.A.R. 28-29-84 refers to the “anniversary date” as the date for annual permit renewal. All active permits must be renewed annually on or before this anniversary date, but “anniversary date” is not defined in the regulations.

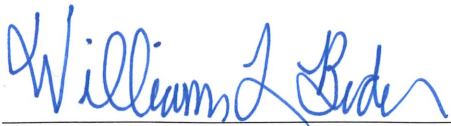

Action

A solid waste permit number will have only one anniversary date associated with it, and this date will not change even if the permit is later reissued on a different date due to a name change or a major modification.

For solid waste permits issued prior to July 1, 1993, the anniversary date is July 1, regardless of the date the permit was issued.

For solid waste permits issued on or after July 1, 1993, the anniversary date is the original issue date of the permit.

This policy shall remain in effect until it is revoked or is rendered obsolete by future amendments to solid waste law or regulations.

William L. Bider
Director, Bureau of Waste Management
